Setting the quantity on your display

Each digit on the display can be set individually. The decimal point on each digit can be turned on and off, allowing you to set the number of digits that come before and after the decimal point.

1. Press and HOLD the reset button for 2 seconds, then release. The Decimal point on the currently selected digit display will flash twice.
2. Press the UP or DOWN buttons to set the number. The Range is [0] through [9] and [Blank]
3. Click and release the Reset button to turn the decimal point on and off for the selected digit.
4. To set the next digit, Press and HOLD the reset button for 2 seconds, then release. The Decimal point on the currently selected digit display will flash twice.
